

**At 12 James was concerned about his
very crowded front teeth**

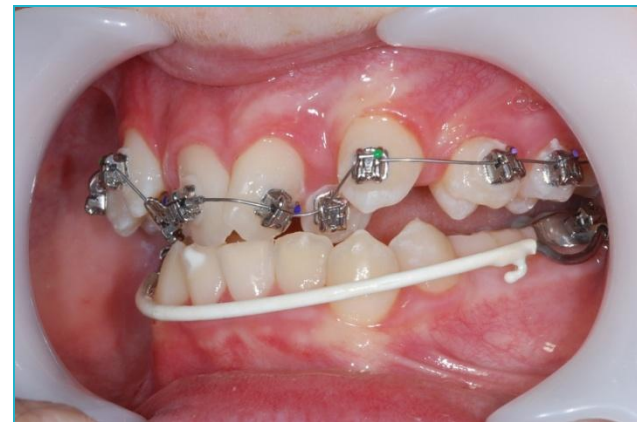

Crowding was extremely severe with narrow and contracted arches

Treatment commenced with an upper expansion plate

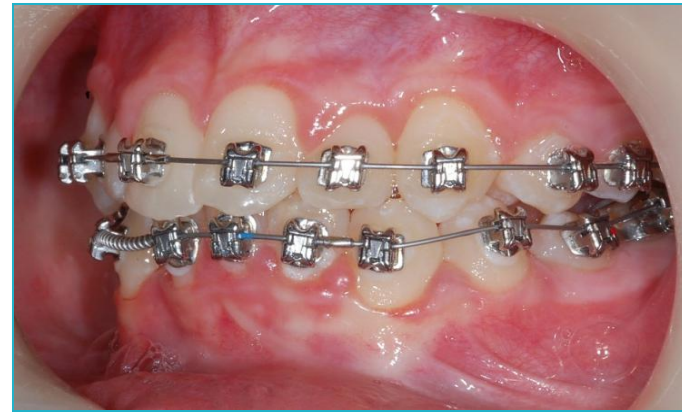

**Treatment continued with a lower lip bumper and the
Damon 3MX appliance in the upper arch**

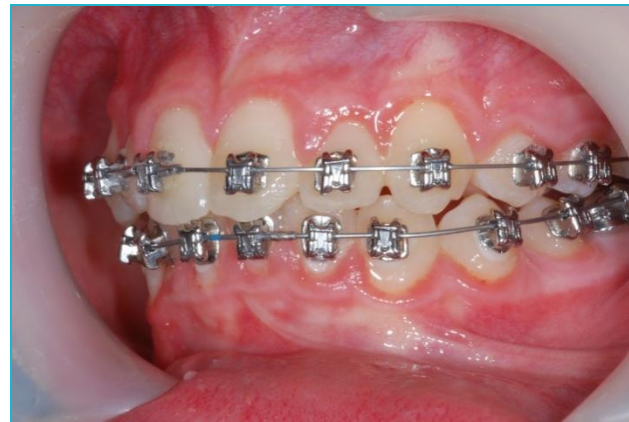

Progress after 6 months with the fixed brace

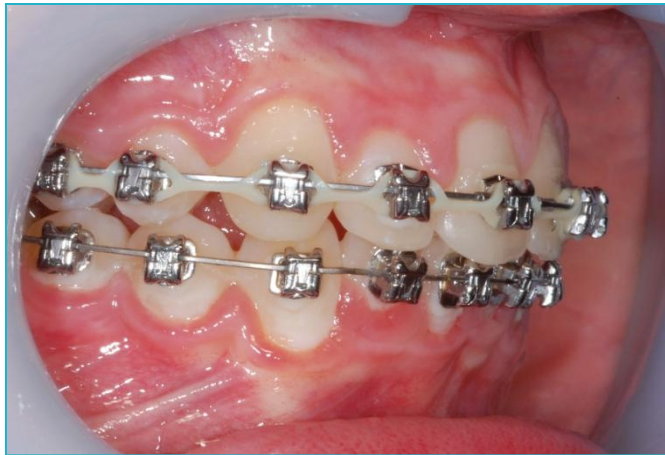

Progress after 9 months with the fixed brace

Progress after 14 months with the fixed brace

Progress after 20 months

**Finished Result
after 22 months**
