

## Lingual Appliance

Abbie was concerned about the malalignment of her front teeth.

Treatment was complete after 5 months using the 2D Lingual appliance, without extractions.

*Abbie*

Before treatment.

Finished result after 5 months.

Before

After

Abbie was delighted with her result.

This system is perfect for adult patients requiring minor tooth movement, who want a completely invisible brace.

Upper arch sequence

Note fixed retainer

Lower arch sequence

Note fixed retainer
