

How much will it cost?

It's important to keep in mind the lifetime value that orthodontic treatment provides. Treatment fees are individually assessed and depend upon the complexity of the treatment required.

The initial consultation costs £98 which includes a full diagnosis.

We believe that the financial considerations should not be an obstacle to a beautiful smile. Interest free, low cost payment plans (no deposit required) are available to help fund your orthodontic treatment, making private treatment much more affordable.

Our payment plans start from as little as £60.00* per month. Please contact us for further details.

Confidence in your smile

“A winning smile can be yours at any age”.

Private orthodontic treatment is now affordable, flexible and convenient.

What is Orthodontics?

Orthodontics is a specialist branch of dentistry which concentrates on the diagnosis and treatment of dental and facial irregularities such as crooked, crowded, protruding teeth and poor jaw alignment.

Orthodontic treatment makes the best of your teeth and improves the harmony between your mouth and jaws. Once you can bite together correctly you can eat more comfortably, care for your teeth and gums more easily and your smile will benefit immensely.

What can Orthodontics do for you?

Chapel Road Orthodontics can help you achieve that award winning smile you have always dreamed of. With over 20 years of clinical expertise, we deliver excellent quality orthodontic care, using the latest technology and techniques to deliver impressive results.

We appreciate that each case is individual and provide you with a bespoke treatment plan tailored to suit your individual needs. State of the art technology and materials are used to allow treatment to be completed effectively and efficiently with minimal inconvenience.

You too, can enjoy a pleasurable journey of transformation.

“First impressions are lasting. You have one opportunity to create a great first impression, let us help you make the most of your smile.”

- Flexible appointment times
- Sophisticated appliances
- Use of state-of-the-art techniques and materials
- Private treatment offers all of the aesthetic options available
- Interest Free Flexible Finance Options

What options are available to me?

DAMON[®]SYSTEM

We offer our patients the very latest Damon System appliances including the Damon 3MX, Damon Q and aesthetic Damon Clear. The Damon braces use a slide mechanism to hold the wire, which allows teeth to move more freely, quickly and comfortably. Above all, it is the way that this low friction system allows far more cases to be treated efficiently without extractions, which makes the Damon System unique.

The Damon Q is a major step forward in low-friction, passive self-ligating technology that delivers far more than straight teeth. It is smaller, has more features built in and contributes greatly to the impressive results that our patients are seeing.

The Damon Clear is so advanced that it is designed to blend in with your natural tooth colour. Damon Clear combines the properties of passive self-ligation technology with the aesthetics that today's image-conscious patients demand. The result is a crystal-clear appliance that surpasses expectations in beauty and functionality.

Patient benefits

- Non-Extraction Treatment
- Damon Clear is aesthetically pleasing
- Improved facial proportion and appearance
- Reduced treatment time
- Greater comfort
- Fewer practice visits

We offer our patients the very latest In-Ovation system appliances including the aesthetic In-Ovation C and In-Ovation L^{MTM}. The In-Ovation braces are gentle with a special free-sliding technology, which places little pressure on the teeth as they are gently guided into place. As a result, treatment not only takes less time and requires fewer appointments but is more comfortable than traditional fixed braces.

In-Ovation C is a very aesthetic way of aligning the teeth. A translucent ceramic bracket is used, delivering fast and comfortable treatment with the added benefit of high aesthetics. The latest high tech wires are used, ensuring rapid but comfortable progress.

In-Ovation L^{MTM} offers a superb alternative to tray aligners for patients requiring 6 mm of movement or less. A breakthrough in cosmetic orthodontics for patients seeking fast, cosmetic correction of minor misalignments and yet are not willing to wear braces. Completely invisible, L^{MTM} self-ligating "quick clips" work within a shorter period of time, to give you the desired, perfect smile.

Patient benefits

- In-Ovation L^{MTM} is 100% invisible
- In-Ovation C is aesthetically pleasing
- Improved facial proportion and appearance
- Reduced treatment time
- Greater Comfort
- Fewer practice visits
